AAS CADD Technology Program Learning Outcomes

Program Required Courses	Demonstrate the attitudes, abilities & skills required to adapt to rapidly changing technologies and the ability to pursue life-long learning.	Create detail & assembly drawings, using American National Standards (ANSI) and/or International Standards Organization (ISO) specifications	Create drawings, while applying the fundamentals of design for mechanical, architectural and civil industries utilizing industry standard 2D / 3D and feature - based parametric design software.	Create a complete set of Residential Architectural documents that meet industry standards, utilizing current CADD software.
