

Spring 2019 Fall-to-Spring Retention and Persistence Report

Office of Planning and Institutional Effectiveness
Dr. Debbie Smarr, Dean

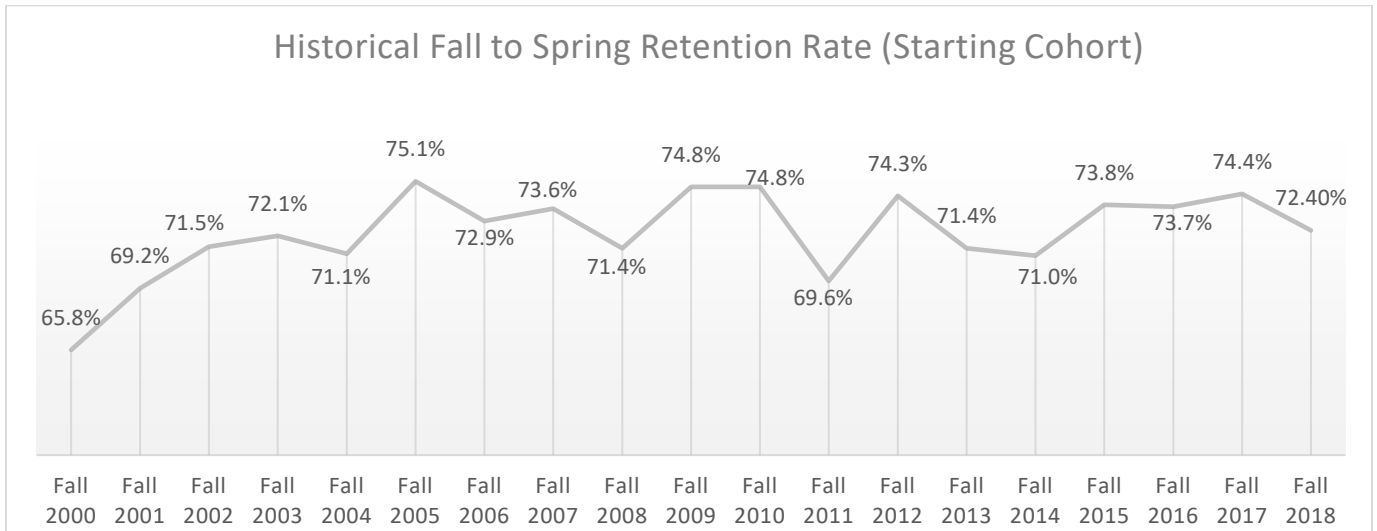

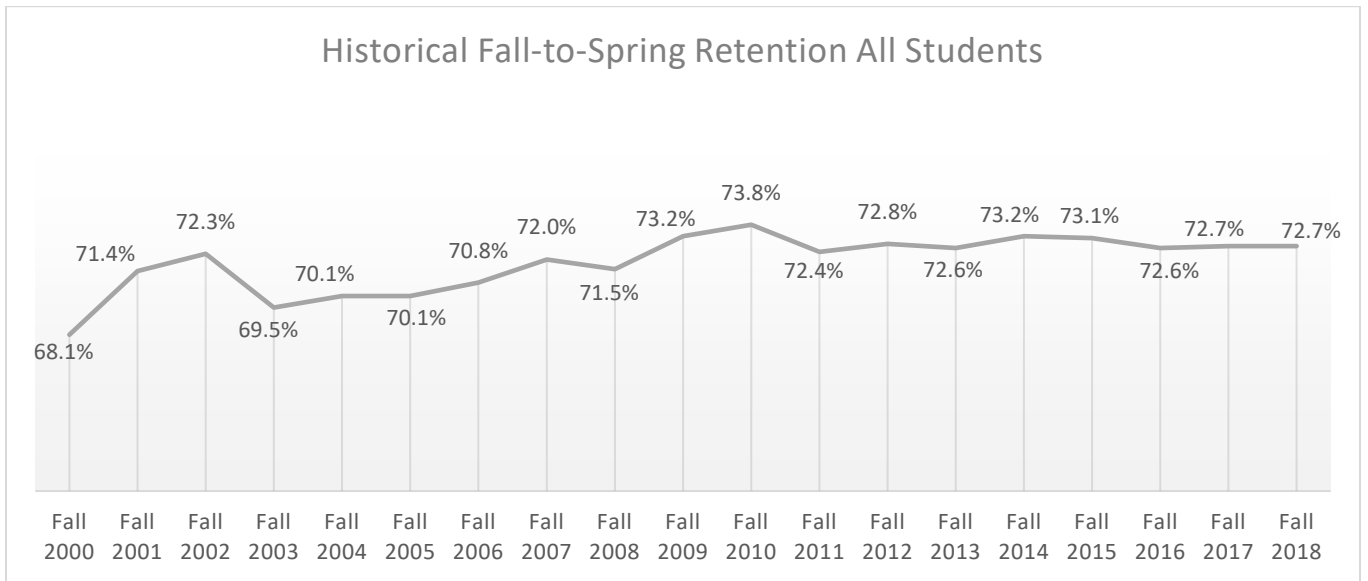

Spring 2019 Fall-to-Spring Retention and Persistence Report

Executive Summary

Grayson College reached a ten-year high fall-to-fall retention rate of all students. The student retention for fall 2017 to fall 2018 was 45.3%.

As of February 14, 2018, the fall 2018 to spring 2019 retention rate of all students is flat with 2017 at 72.7%. The fall-to-spring retention of new starting cohort students dropped slightly to 72.4%, which is a 2% decrease from 2017. With the change from a traditional 16-week semester to two 8-week terms within the semester, we are seeing approximately 280 students who enroll in just the second 8-week term and currently have just 20 students who meet these criteria for the spring 2019 semester, with enrollment ongoing. This leads us to believe we will see an uptick in the fall-to-spring retention rate of all students as well as starting cohort students following the start of the second 8-week term.

The national average for fall to spring retention of starting cohort students is 73.9%.
